Good Day Wenko,

Pleased to hear you had a good weekend, as discussed on the phone, we have been unable to source LSFO & LSGO in Australia or Tasmania

As per your vessels schedule  
Port Hedland <> Bell Bay <> Melbourne (pls see attached)

Please note there is extremely rarely available LSGO (max 0.1% / 1.0% sulphur) in these countries, Tasmania never (MGO only) and for LSFO 380cst (or other LS grade Fuel Oils) is completely inaccessible in this area of the world.

Understanding you require LS Fuel/Gasoil to enter Seca Zone of Seattle, we would have provided you the closest option for bunkers only, but this would have been Singapore likely, basis the vessel only having 30mts ROB and that was only sufficient to arrange our bunkers only call to Melbourne, we had no Low Sulphur bunkers options available to offer your ship.

Please confirm the above is clear enough

Many thanks

**Sam Frazer Groves**
